“Summary”

1. Part – 01 – Mentaly sex abounded

Project: Psychology problems will arise due to excessive tension, anxiety and excitement during sexual intercourse or masturbation. As a result, there will be a decrease memory power. This also paves the way for heart attack. This could be applicable to people in the age groups from 16 to 65.

Investigative Duration: 5 Years

Project: By excessive consumption of alcohol; increased smoking and sex, excessive hormones are generated and released from the bile subsequently. This will improve the thinking of the people speedily who do these acts.

Project: Those who are very much dark skinned or who are more whitish or who are very much thin or very tall or very long or very short show the symptoms of excessive sexual desire. They will become victims of sexually related problems and will be immersed in more amorous activities most of the time.

Investigative Duration: 2 Years

Project: Those who work in the software field and who work under pressure or the writing field will naturally have much desire for sex. They release more hormones and produce sexual desire and yearning for sex with a woman. This is not due to chromosomes or hormones, but this is a psychology problem. It is not perfection to look at a tree and consider life or matter. It is perfection to consider the life of the roots under the tree and the special reason why the three was born there, this is because there are special reasons for anyone to work in the field of research in the field of writing in the software fields. At the beginning of the education phase, there are those who are in the phase of mars and Venus. In the beginning there will be those who will be educated and who will be in the phase of mars, Rahu and Venus can become software engineers, authors, researchers and doctors but at this time, such as those who are in the software field, who are working on the field of writing of course they have much desire for sex. In such people more and more hormones are released, and produces masturbation and sexual desire with the woman. This is not due to chromosomes or hormones, but to say this is a psychological problem and that this arose. That is, at this stage such as Ketu planetary phase initiation and the weakness of the planets exacerbate sexual cravings, masturbation, excess of female infatuation and men’s fascination is over blown. Then the Psychological system is transversed.

Project: If Jupiter, mars is in lagna and Saturn or mars in Saturn respectively, it should be in 5 and 7 or Saturn should be in the 12 house of the decaying (weak) moon. Or Chandra, mercury should be the Center of vision or other planetary beings. If this is the case, the person will have a mental illness and become mad. Taurus (Zodiac Sign) will then convert him into mentally and physically defective.

- A lunar planet is responsible for the loss of human memory because mercury is affected by the planet.
- If the planet Venus is affecting the moon, man is used to fatigue and tiredness.
- If the man is affected by the sun, he will suffer from genetic diseases.
